

## HAZARD COLUMN PROTECTORS (PRODUCT CODE: WH/100 RANGE)

### KEY FEATURES – ABSORBS LOW SPEED IMPACT – PREVENTS ACCIDENTAL DAMAGE - FAST ON SITE ASSEMBLY

**Warehouse rail** is a comprehensive range of rails, uprights and fixings. The spring steel uprights give that important flexibility that absorbs low speed impact. Designed to work in warehouse environments and external applications to prevent accidental damage to service installations such as ducting for air conditioning, rainwater pipes and lighting columns.

**Customised column protection** is manufactured in various diameter sizes and layouts to suit your site.

WH/1 Warehouse Rail Column Protector (2 rails)  
WH/2 Smart U channel (3 rails)

**The spring barriers** are designed to absorb impacts from slow moving traffic and recover. They also reduce the effects of 'shock' through concrete decks on multi-storey car parks.

**The column protectors** can be used for both internal and external applications and are finished to a high corrosion proof standard. Simple assembly and installation makes the column protectors very adaptable.

**Choice of sizes:** The steel column protectors are rolled in a wide range of sizes for the internal diameter from 400mm. The spring steel legs as standard are 610mm high and each leg has a fixing bolt for a 16mm anchor bolt.

**The steel column protectors have concealed fixing/joint** to reduce the risk of accidental vehicle damage as well as protecting your property.

### SPECIFICATION

Steel: Steel ranges between 7.75 and 8.05 g/cm<sup>3</sup>  
(0.280–0.291 lb/in<sup>3</sup>).<sup>[6]</sup>

Components are first immersed in an acid de-greasing agent to remove surface contaminants, this process at ambient temperature, removes mill scale and rust.

Components are rinsed to remove acid residues before being immersed in flux, which ensures effective flow of zinc over the steel surfaces.

### Colour Options

Galvanised finish

### Size Options

From 400mm internal diameter

### FREQUENTLY ASKED QUESTIONS

#### Can I fit these steel column protectors on my asphalt covered car park?

Yes the steel column protectors can be fixed to asphalt or concrete surfaces. Each protector has 4 fixing points (one per leg) for M16 anchor bolts.

#### Will the steel column protector fit around the lighting column?

Yes each steel ring is split and is supplied with a concealed steel joint for fast and trouble free assembly. The steel legs are designed to absorb low speed impact.
